5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		6. SOURCE Military & Civilian		<input type="checkbox"/> Was Astronomical <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical	
7. LENGTH OF OBSERVATION 2 mins/5 mins		8. NUMBER OF OBJECTS one	9. COURSE North	<input checked="" type="checkbox"/> Other Satellite <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown	
10. BRIEF SUMMARY OF SIGHTING Rnd obj, appeared to be slightly larger than the planet Mars, red-orange. Traveling at terrific speed. Two rpts, both essentially same w/the exception that one estimates the duration as 2 mins and the other, 5 mins. Both give the same DTG but no mention is made of observers being together at the time of observation.			11. COMMENTS No confirmation of satellite track; however, sighting is characteristic of orbital observation. 1958 Gamma was visible fm 26 Mar - Jun 28 '58. Case considered probable 1958 Gamma or Sputnik III.

Sputnik: XIV

CAMBRIDGE, Mass., May 16 — (UPI) — The first American long-range rocket picked up Speed 8 III and the booster rocket which propelled it today.

The two Russian-made, space interceptors, scheduled to take over the United States' contract, were moved to shipment at the Air Force's Cape Canaveral installation at Woomera, 1949.

Department of Defense officials said the two missiles were the booster stage of a Soviet-made Air Force missile, and some officials believe it was shot down over the Gulf of Mexico.
